

## LK200 Full-outdoor Packet Radio

- Zero footprint, fully integrated and cost-effective solution
- Up to 900Mbps capacity with Hitless Automatic Adaptive Coding and Modulation (HAACM)\*
- Network synchronization with SyncE
- QoS (Quality of Service) and VLAN for traffic prioritization
- Scalable bandwidths (ETSI up to 112 MHz, FCC up to 80MHz) and flexible modulation schemes (QPSK-1024QAM) to secure best link performance
- Power supply with coaxial cable and Optional Optical GE port for strong lightning protection.
- High availability and reliability based on licensed frequencies from 6.5G to 23G
- Jumbo frame up to 9K bytes, layer-2 switching, auto MDI/MDXI, VLAN, QoS, QinQ, STP/RSTP, RLS
- RF and digital loopback capability
- Digital Pre-distortion feature
- ATPC and built-in FEC function
- Built-in Bit Error Rate (BER) monitoring and spectrum scan
- Small and attractive profile, Low latency and low power consumption, wide operating temperature range fits all weather conditions
- Local management capability as well as SNMP
- Zero IF design for easy manufacturing

## LK200 Full-outdoor Packet Radio

A compact all-outdoor packet radio solution, combining the advantages of an all-outdoor profile with carrier-grade performance of LK200 Family, generates significant CAPEX and OPEX savings.

**LK200 Packet** is the innovative packet radio which is the perfect replacement of optical fiber cable and FSO.

Robust and durable single-box structure withstands harsh weather conditions and can be easily mounted on towers, rooftops, lamp posts, traffic light poles and small outdoor mobile cell-sites.

Enhanced spectrum utilization, low-latency traffic and comprehensive synchronization solution.

Software-scalable bandwidths (3.5/7/14/28/56/112MHz) and adaptive modulation schemes (QPSK-1024QAM) provide traffic with more flexibility and strong adaptability to various application environments.

**LK200 Packet** is compliant with the IEEE 802.1/3 and RFC standards for various Ethernet functionalities.

User-friendly Management- Telnet, WEB GUI, NMS, SNMP Manager. Software and firmware online upgradeable.

## Applications

### Cellular Backhaul

LK200 Packet is a perfect fit for 3G/LTE/WiMAX base station backhaul to replace optical fiber and FSO, ideally for new all-packet base station, and caters to various connection needs: voice, data, management and control. With SynE synchronization, LK200 Packet could meet any RAN network requirement.

With external PWE3 interface unit, LK200 Packet could provide up to 16E1 and 4FE interfaces for 2G/3G/LTE co-site scenario.

Figure 1 – Cellular Backhaul

### ISP Backhaul

LK200 Packet allows ISPs, who own no land lines, to quickly establish a backhaul without quality compromises. ISPs can grow up their profits by delivering services with guaranteed SLA or reaching distant clients from their PoP using radios with similar cost at licensed frequencies to avoid spectrum congestion.

Figure 2 – ISP Backhaul

### Broadband Access

LK200 Packet is an affordable medium capacity radio solution for enterprises that need private lines and broadband Ethernet traffic.

It offers solutions with fine combination of cost effectiveness & short commission time for the following applications:

- \* DSLAM backhaul
- \* No right-of-way
- \* Extending network from a fiber POP
- \* Private Communication networks

## Specifications

Frequency (GHz)	6	7	8	11	13	15	18	23	26	38
